

Where Precision Meets Purpose

Partner with Artifex Solutions for Unmatched Quality and Innovation

Your Vision Our Expertise

At Artifex Solutions, LLC, we transform innovative designs into life-changing medical devices. Based in San Juan, Puerto Rico, our state-of-the-art facility is equipped to deliver precision at every step. From Swiss turning and 5-axis CNC milling to advanced finishing processes like titanium anodizing and UDI-compliant labeling, our team collaborates with you to meet your unique needs, adhering to your specific delivery schedules and requirements.

Quality You Can Trust

Quality is the foundation of everything we do. Our ISO 13485:2016-certified Quality Management System ensures every device meets the highest standards of performance and compliance. As an FDA-registered manufacturer adhering to 21 CFR Part 820, we meticulously control every step of production—from design to delivery. Our Quality Assurance team continuously refines processes to enhance reliability, giving you confidence in every product we create.

Advanced Manufacturing Capabilities

At Artifex Solutions, we specialize in precision manufacturing tailored to your needs. Our state-of-the-art facility is equipped to handle intricate projects with unmatched accuracy and efficiency.

Precision Manufacturing

Swiss turning (0.9–26mm bar stock) and 3/5-axis CNC milling with tolerances as tight as $\pm 0.0005"$ (0.013mm). Expertise in medical-grade titanium, stainless steel, PEEK, and high-performance plastics.

Specialized Techniques

Deep hole drilling, thread whirling, and more to bring complex designs to life.

Finishing & Assembly

In-house deburring, laser marking, ultrasonic cleaning, titanium color anodizing, electro-polishing, stainless steel passivation and UDI-compliant labeling. We also manage outsourced services like vacuum heat treating, Type II anodizing and TiN coating through trusted partners.

Why Artifex?

Partnering with Artifex means more than precision manufacturing—it's about achieving your goals with confidence.

Client-Centric Partnership

Tailored support for startups and established OEMs alike.

Cost Efficiency

In-house capabilities reduce production costs.

Faster Time-to-Market

Streamlined processes accelerate your product launch.

Post Machining Work

Post machining work currently performed In-House:

- ▶ Deburring
- ▶ Magnetic Tumbling
- ▶ Laser Marking
- ▶ Ultrasonic Cleaning
- ▶ Bead Blasting
- ▶ Titanium Color Anodizing
- ▶ Satin Brush
- ▶ Stainless Steel Passivation
- ▶ Stainless Steel Electro-Polishing
- ▶ Packaging
- ▶ Custom Product Labeling
*UDI Compliant

Post machining work currently performed by outside vendors:

- ▶ Vacuum Heat Treating
- ▶ Type 2 TI Anodizing
- ▶ Titanium Nitride (TiN) Coating
- ▶ Cobalt Chrome Electro-Polishing
